The House

The house develops on a 300 sq.m. area over 3 floors + a spacious portico.

Ground Floor:

The ground floor consists of an open plan layout with of a fully equipped fitted kitchen, dining area, lounge area and a snug with a Volcano wood burning stove which also can heat the house and hot water, in addition to the underfloor heating.

On this floor there is also a store room, washroom and WC.

This floor is characterized by many original elements, such as the wooden beams and the delightful stone arch that separates the living room from the snug.

From the living area, you have direct exit out to the big portico, where you can enjoy al-fresco dinners with your family and friends.

A family bathroom is shared by 2 double bedrooms with en-suite walk-in shower wet rooms, and an additional double bedroom.

Some bedrooms are characterized by a nice contrast between some stone and plaster walls.

The white plaster is excellent to give the rooms more light, while preserving some original stone walls.

Second Floor:
